# WHAT ARE *Pre-ETS Services?*

Pre-ETS is funded by MassAbility and is designed to supports students with disabilities ages 14–22 who are enrolled in high school, post-secondary education, or vocational training. Services are provided at no cost.

A lifetime of living with their disability has taught students what to expect at home and school. What happens when students go out into the world and begin working? Often, students are ill-prepared for the challenges that await them in the workplace. Programming is designed to help students gain the skills they need to transition out of high school and into the adult world.

Through individualized and group services, Pre-ETS helps students explore careers, build workplace readiness, gain experience, practice self-advocacy, and prepare for further education or employment to ease the transition into adulthood.
