

Welcome Families!

Your child has been referred to Attleboro Enterprises Inc. (AEI)'s Pre-ETS Program. Pre-ETS is a program funded by MassAbility (formerly MRC), for students ages 14-22, who are enrolled in school and have a documented disability. Pre-ETS is designed to help students gain the skills they need to transition out of high school and into the adult world. We do this throughout a variety of in person and virtual classroom instruction. Our curriculum is based upon five core components, which are, Job Exploration Counseling, Workplace Readiness Training, Work Based Learning Experiences, Self-Advocacy, and Counseling on Postsecondary Education or Training.

In order for students to participate in Pre-ETS classes, we will need to receive a completed MassAbility referral form as well as documentation of disability, such as but not limited to an IEP, 504 plan, or medical documentation.

Students who are actively engaged in Pre-ETS classes and meet eligibility criteria may have the opportunity for a paid internship. We are happy to provide more information about internships upon request.

Thank you,

Nichole Gary
